

INFILL SAND

Our **NEW LAPIS GOLD** sand is specifically graded to enhance the performance and longevity of synthetic turf systems, offering several key benefits:

- **Kiln Dried for Optimal Performance:** Our sand undergoes kiln drying, which ensures it stays dry and ready for immediate use, improving installation efficiency.
- **Spherical Uniformity for Superior Drainage:** The uniform shape of our sand particles allows excellent drainage, preventing water build-up and ensuring the turf's longevity.
- **Natural Color & Aesthetic Appeal:** With its natural color, our sand seamlessly integrates into synthetic turf systems, maintaining a clean and professional appearance.
- **Compaction & Stability:** Our in-fill sand provides reliable compaction, ensuring the turf remains stable, resilient, and able to handle high traffic over time.
- **Low-Cost, High-Value Solution:** We offer competitive pricing without compromising on quality, providing a cost-effective in-fill solution for your projects.
- **Warehouse Distribution Locations:** With multiple warehouse locations, we can efficiently distribute our products nationwide, reducing shipping times and costs.

Our Lapis Gold sand will enhance the performance and durability of your synthetic turf installations while maintaining cost-efficiency.
